

ALTAIR

Rimadesio

ALTAIR IS A DOUBLE-SIDED CONTAINER SYSTEM AVAILABLE IN DIFFERENT SIZES AND INTENDED FOR DOMESTIC OR PUBLIC SPACES. THE MAIN FEATURE OF THE SYSTEM IS THE LARGE DRAWER WITH A DOUBLE-SIDED OPENING, SLIDING ON RETRACTABLE GUIDES ENABLING THE EXTRACTION OF LARGE TRAYS IN OLMO AND ROVERE TERMOTRATTATO. THE SYSTEM CAN BE CUSTOMISED IN FINISHINGS AND ACCESSORIES ACCORDING TO THE CUSTOMER'S NEEDS, SO AS TO BE COMBINED WITH ALL THE FURNITURE OF THE COLLECTION.

IT Altair è un sistema di contenitori bifacciale disponibile in diverse dimensioni e destinato a spazi domestici o pubblici. L'elemento caratterizzante del sistema è l'ampio cassetto ad apertura bifacciale, a scorrimento su guide a scomparsa che permettono di estrarre i grandi vassoi in olmo e rovere termotrattato. Il sistema può essere personalizzato in finiture e accessori a seconda delle esigenze del cliente, in modo da essere abbinato a tutti gli arredi della collezione.

DE Altair, das neue beidseitige Behälter-System ist in verschiedenen Größen erhältlich und für Wohnräume oder öffentliche Räume gedacht. Das charakteristische Element des Systems ist die große, beidseitig zu öffnende Schublade, die auf verdeckten Führungen gleitet und das Herausziehen der großen Fächer aus Olmo und Rovere Termotrattato ermöglicht. Das System kann in Bezug auf Oberflächenausführung und Zubehör an die Bedürfnisse des Kunden angepasst werden, sodass es sich mit allen Möbeln der Kollektion kombinieren lässt.

FR Altair est un système de rangements double face disponible en différentes dimensions, et destiné aux espaces domestiques ou publics. L'élément caractéristique de ce système est le grand tiroir avec ouverture double face, coulissant sur des guides escamotables qui permettent d'extraire les grands plateaux en olmo et rovere termotrattato. Ce système peut être personnalisé en termes de finitions et d'accessoires selon les besoins du client, pour être assorti à tous les meubles de la collection.

ES Altair es un sistema de contenedores de doble cara disponible en diferentes tamaños y pensado para espacios domésticos o públicos. El elemento característico del sistema es el gran cajón con apertura de doble cara, deslizante sobre guías escamoteables que permiten extraer grandes bandejas de olmo y rovere termotrattato. El sistema se puede personalizar en acabados y complementos según las necesidades del cliente, de manera que combine con cualquiera de los muebles de la colección.

RU Altair – это двусторонняя система хранения, доступная в различных размерах и предназначенная для домашних или общественных помещений. Характерный элемент системы – большой ящик, который можно выдвинуть с обеих сторон благодаря скрытым направляющим, и большие полки из вяза. Отделка системы может быть выполнена согласно пожеланиям клиента, аксессуары добавляются в соответствии с его потребностями, что позволяет сочетать ее со всеми предметами мебели коллекции.

汉语 Altair 双向陈列柜系统有多种尺寸可供选择，适用于居家和公共空间。这套系统的特色元素为可双向拉出宽大抽屉，由榆木和热处理橡木制成的内置大托盘在隐形导轨上滑动、开合。这套系统之各式表面处理和配件可供定制，并与系列中所有其他家具相互搭配。

EN Inside the pull-out trays finds space specific equipmen, also made of olmo or rovere termotrattato, and equipped with accessories such as containers with multiple or cross separators, designed for glasses, jewellery, belts and ties. On the front and back, Altair features open compartments, large and small drawers with fully extractable push opening and softclose mechanism. The upper surface is made of grigio trasparente or riflettente chiaro glass, resting on two thin sides, lacquered to match the structure. The aluminium profiles under the top hide the diffused LED lighting that illuminates the two large pull-out trays.

IT All'interno dei vassoi estraibili trovano spazio attrezzature specifiche, realizzate anch'esse in olmo e rovere termotrattato, e dotate di accessori come contenitori con separatori multipli o a croce, pensati per riporre occhiali, gioielli, cinture e cravatte. Altair è inoltre caratterizzato, su fronte e retro, da vani a giorno, cassetti e cassettoni con apertura push ad estrazione totale e rientro ammortizzato. Il piano superiore è realizzato in vetro trasparente grigio o riflettente chiaro appoggiato su due fianchi sottili laccati in tinta alla struttura. I profili in alluminio sotto top nascondono l'illuminazione led diffusa a valorizzare i due grandi vassoi estraibili.

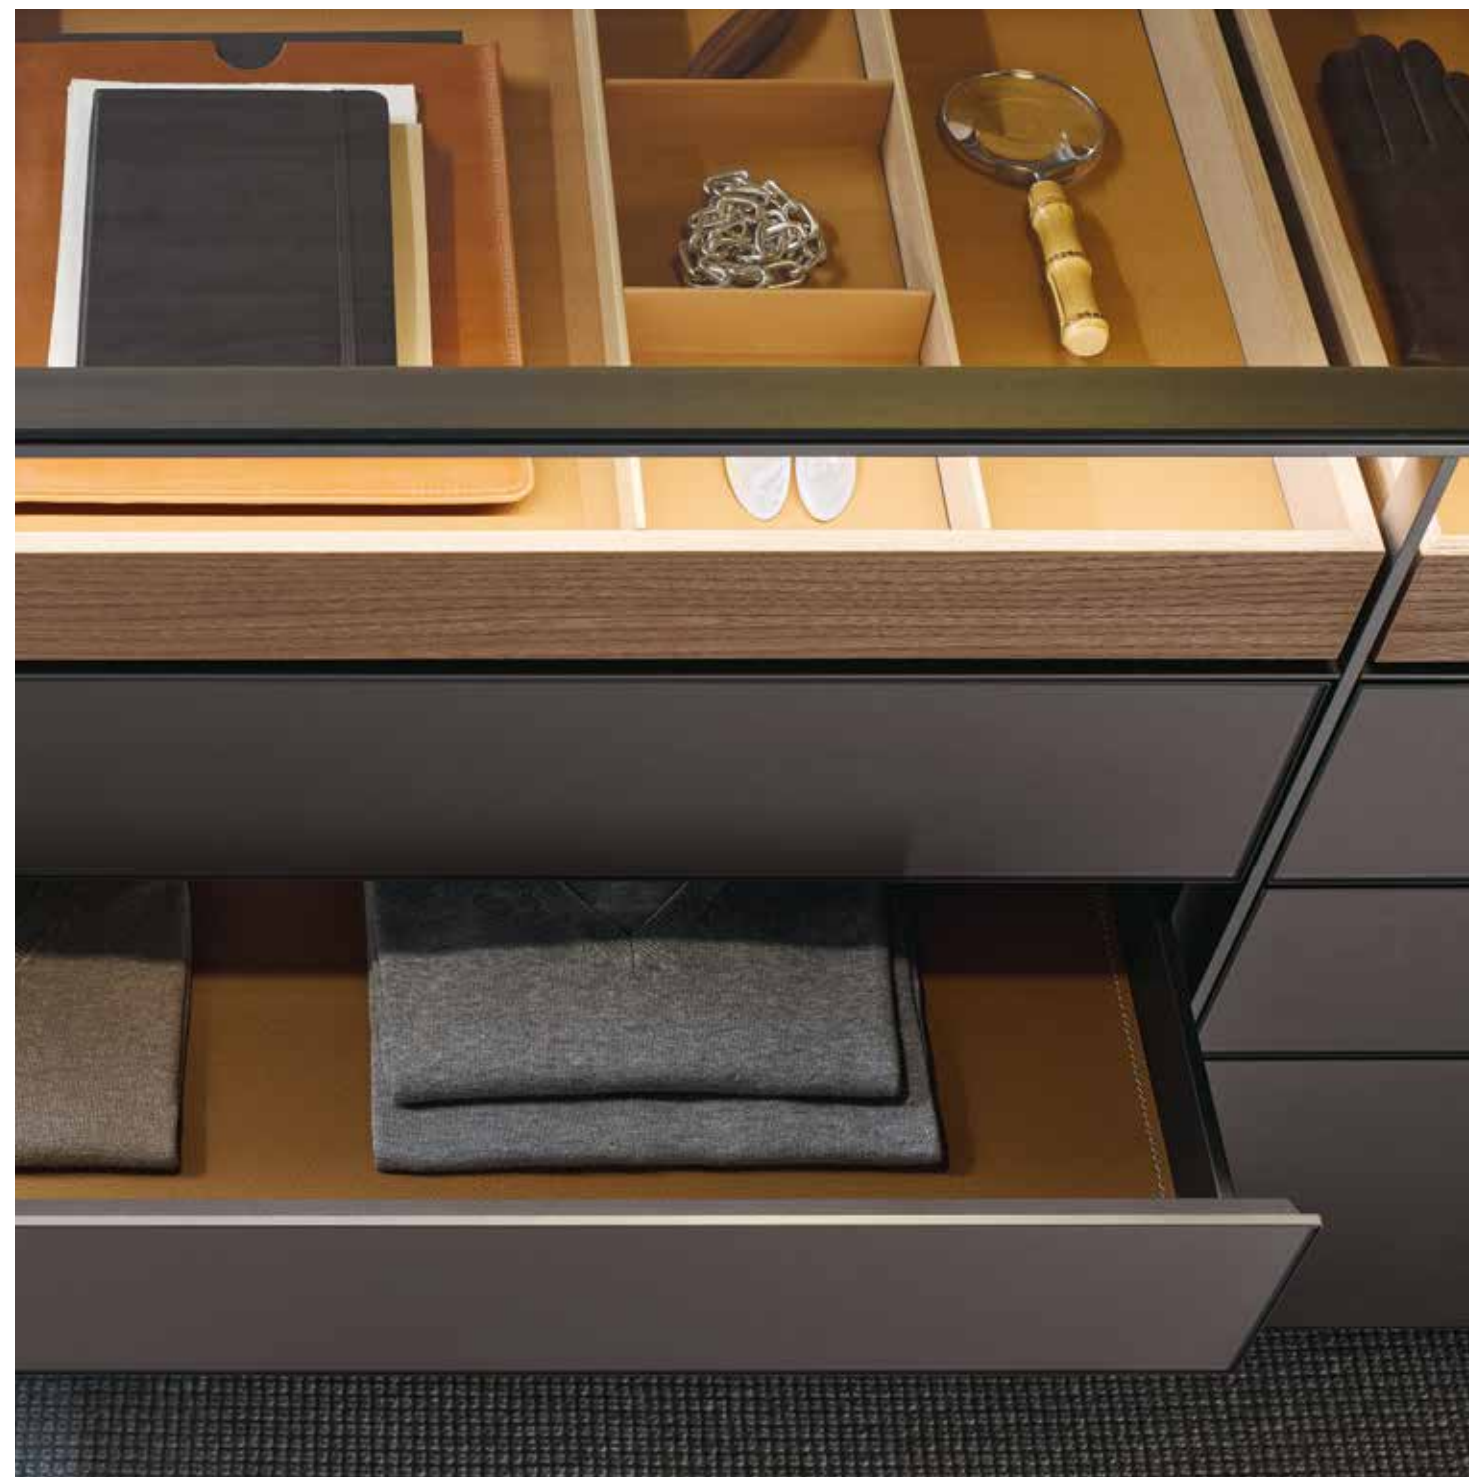

DE Im Inneren der ausziehbaren Fächer befinden sich spezielle Beschläge, ebenfalls aus Olmo und Rovere Termotrattato, die mit Zubehör wie Behältern mit Mehrfach- oder Kreuzunterteilung ausgestattet sind, welche für die Aufbewahrung von Brillen, Schmuck, Gürteln oder Krawatten bestimmt sind. Altair zeichnet sich sowohl auf der Vorder- als auch auf der Rückseite durch offene Fächer, Schubladen und Frontauszüge mit Vollauszug und gedämpftem Einzug aus. Die Platte besteht aus grauem, Transparente Grigio oder Riflettente Chiaro Glas, das auf zwei dünnen, passend zur Struktur lackierten Seitenteilen ruht. Unter den Aluminiumprofilen an der Oberseite verbirgt sich eine diffuse LED-Beleuchtung, die die beiden großen Auszugstabletts hervorhebt.

FR À l'intérieur des plateaux amovibles, se trouvent des équipements spécifiques, eux aussi réalisés en olmo et rovere termotrattato, dotés d'accessoires tels que systèmes de rangement à séparateurs multiples ou croisés, conçus pour ranger lunettes, bijoux, ceintures et cravates. Altair se caractérise également, à l'avant et à l'arrière, par ses compartiments ouverts, ses tiroirs et caissons avec ouverture à pression à extraction totale et fermeture amortie. Le plateau supérieur est en verre grigio trasparente ou riflettente chiaro, et repose sur deux fines faces laquées assorties à la structure. Les profilés en aluminium sous le plateau dissimulent l'éclairage LED diffus pour mettre en valeur les deux grands plateaux extractibles.

ES En el interior de las bandejas extraíbles hay herrajes específicos, también de olmo y rovere termotrattato, dotados de accesorios como contenedores con separadores múltiples o en cruz, diseñados para guardar gafas, joyas, cinturones y corbatas. Altair también se caracteriza en la parte delantera y trasera por sus compartimentos abiertos, cajones y cajones grandes con apertura a presión de extracción total y cierre suave. La superficie superior está realizada en cristal grigio trasparente o riflettente chiaro, que descansa sobre dos finas caras lacadas a juego con la estructura. Los perfiles de aluminio que se encuentran debajo de la superficie de apoyo ocultan una iluminación LED difusa que realza las dos grandes bandejas extraíbles.

RU Внутри выдвижных полок предусмотрено место для специального оснащения, также выполненного из вяза, и дополненного контейнерами с множественными разделителями, предназначенными для хранения очков, украшений, ремней и галстуков. Altair также характеризуется и открытыми отделения, стандартными и глубокими ящиками спереди и сзади с механизмом открытия нажатием и плавным закрытием. Верхняя поверхность выполнена из серого прозрачного или светоотражающего стекла, опирающегося на две тонкие лакированные боковые стойки в тон структуре. Алюминиевые профили под топом скрывают светодиодную подсветку с рассеивающим светом для двух больших выдвижных лотков.

汉语 在抽拉式托盘设有摆放收纳配件的空间，该收纳配件以榆木和热处理橡木打造，当中可配置分隔收纳格或十字收纳格等部件，用于存放眼镜、珠宝首饰、皮带和领带。除此之外，Altair 的前后两侧设有开放式收纳空间，带全抽拉式推弹开启系统和软关闭功能的大、小抽屉。顶部台面由灰色透明或透亮的反光玻璃制成，架于结构两侧的纤薄的边缘之上，薄边与结构的表面处理互相搭配。台面上方的铝合金轮廓内藏 LED 漫射光照明系统，突出了两件抽拉式大托盘的功能性。
