

FASCE CROMATE

Design: Luigi Caccia Dominioni, 1957

Fasce Cromate offers mirrored metal in the place of a lacquer or varnish finish to cover the core material. The irony here is in uncovering what is generally hidden to create a new and unknown object. The glass table top is offset by the chrome rim creating reflections and transparency in the geometric planes and surfaces. Once again Luigi Caccia Dominioni is deliberately stimulating our senses with this truly innovative piece that pushes design to new horizons.
