

Life System

Year
Designer

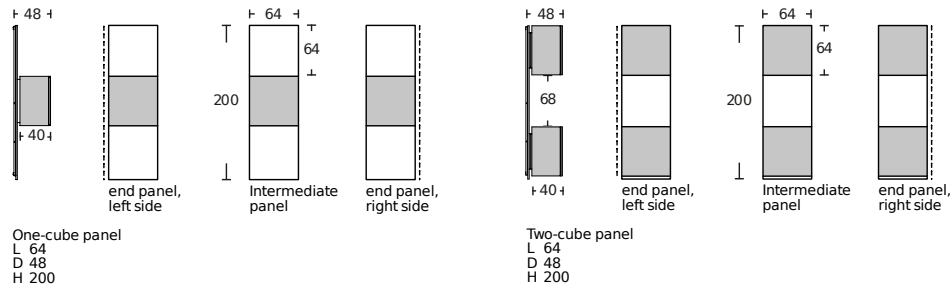

1975 - 2022
Roberto Monsani

Monsani's Life system, subtly repropotioned and redesigned for versatility, takes on fresh luxury with ribbed glass, diffused LED lights, lightweight glass shelves, and its checkerboard effect in the vibrant vintage car colors of Meda and Lopez Quincoces's vision for Acerbis's fine-finish lacquers.

Its modernized lighting allows the cubes to sit flush against the wall, and in keeping with Acerbis's specialized closures, its hinges have been rendered invisible, underlining the strong lines of its design.

The wall system fulfills a contemporary need in the home with flexibility, visual potency, and Acerbis's exceptional quality and functionality.

Dimensions

Finishes

The panels and body of the units are in medium-density wood fibre, all lacquered in white with a matt finish. The unit doors have a glossy lacquer finish in the following colours: burgundy, pink, dark green, mustard yellow, brick red, navy blue, sand, clay, linen, white and black. The doors are reversible; swing direction can be reversed during assembly. The back of the unit is fitted with narrow linear ribbed glass, softened by a special satin finish for a unique tactile and visual sensation. The glass allows light to diffuse evenly inside the cabinet.

Tempered glass shelf, 5 mm thickness.
The units have concealed hinges inside the cabinet structure.
A polished stainless steel ferrule enhances the detail and creates a superb finish.

All modules can be wall-mounted or laid on the ground.
